

Gregory Grimaylo

gregrimaylo@gmail.com

617-777-4425

Swampscott, MA

Graduated student seeking an entry level Software Engineer position in order to utilize my knowledge in the field and gain more experience. Well-organized and collaborative team player with strong communication and analytical abilities.

Education

University of Massachusetts - Amherst

B.S. in Computer Science

08/2020 – 05/2023

3.85 GPA, Dean's List: Fall 2020, Chess Club Member

University of Massachusetts - Lowell

B.S. in Computer Science

08/2019 – 08/2020 (transferred to UMass Amherst)

3.89 GPA, Dean's List: Fall 2019, Spring 2020

Languages

Operating Systems

- Microsoft Windows
- UNIX (Ubuntu, Linux)
- macOS

IDE / Text Editors

- Microsoft Visual Studio 2019
- Visual Studio Code
- Eclipse
- PyCharm
- IntelliJ IDEA

Projects

<https://github.com/ggrimaylo23>

- Word Freak (C): The program takes some files as input, counts how many times each word occurs across them all, and writes those words and associated counts to an output file in alphabetical order.
- Connect4 (Python): A modified version of Connect4. An agent is made using different search algorithms (versions of minimax) and this agent can play against other automated agents or humans. The game continues until the board is full, and the scores for each player are calculated to determine who won.
- Weather App (CSS, HTML, JavaScript): A weather app that uses Open Weather App API to display the weather on a page with a background image.

Skills

- Software engineering: debugging, testing, programming abstractions, algorithm design
- File input/output, socket programming
- Artificial Intelligence: heuristic search algorithms, game playing
- Constructing pieces of a search engine
- Math skills: Calculus 1-3, Linear Algebra, Probability
- Front end development: HTML, CSS, JavaScript
- Git, Azure DevOps version control
- SQL database management
- Linux bash shell programming
- Fluent in English and Russian

Work Experience

Software Intern at Brooks Automation

06/2022 – 08/2022

- Tested and verified software of [Brooks wafer handling robots](#) (embedded software).
- Created and automated existing test cases.
- Continuously executed tests on robots and collected results.
- Wrote Python scripts which reduced manual testing. Ex: script that continuously asks robot how much RAM it uses, records results to external file.

Volunteering

Boston Association of New Americans, Inc. (BANA)

06/2015 – 08/2019

- Helped with office tasks, taking messages, scanning documents, and answering phone inquiries.
- Assisted with computer learning
- Translated from Russian into English and vice versa.
